SHOW REQUIREMENTS

A. The producer must have a standard pole bending pattern as shown below. A rider and horse run past a timer line to the end of a line of six poles, then turn the end pole and weave down through the pattern, again turn at the last pole and weave back up, then run back home across the timer line. The fastest time will win. The pole pattern consists of plastic poles that are set 21 feet apart and the timer line 21 feet from the first pole. If a pole is knocked over, a 5-second penalty is assessed or a "no time" given.

B. Shows must have "open" entry. If an association membership is required for the show, a "non-member" provision must be available to allow anyone to participate.

C. Electronic timers are preferred, but not required.
